Bootstrap & HMTL 5

REST API Development

MVC and Repository Patterns

PROJECTS

CRM

Developed a comprehensive CRM system to streamline lead management, customer interactions, and lead allocation processes.

ShopSmartlyPOS.com

POS RESTful API drives our retail and e-commerce, managing orders, diverse products, and inventory with barcode precision. It oversees outlets, optimizes stock allocation, and streamlines cart transactions, ensuring exceptional customer satisfaction. This robust API is our business's foundation, delivering an efficient and user-friendly point of sale solution.

National Program for Family Planning & Primary Health

Developed a comprehensive data entry system to support the National Program for Family Planning & Primary Health, facilitating the actions of lady workers, lady supervisors, district coordinators (DC), and program coordinators (PC).

Islamabad College of Arts and Sciences (Icas.edu.pk)

Islamabad College of Arts and Sciences (ICAS), API integration enables dynamic content management and delivery, ensuring a responsive and adaptable educational environment. This dynamic approach enhances content accessibility and flexibility for students and staff.
